

UNI-login and wireless access

Internet, Lectio ao.

All students at Nørre G have their own UNI-login. UNI-login is one set of username and password that can give you access to several systems.

The first time you login with your UNI-login you need to change the password. The current password is generated by our system and consists of "ltce" followed by the last four digits in your CPR number (e. g. ltce1111 – NB! With a capital "i" – if you do not have a CPR number contact IT-dept.).

You log in this way:

- Connect to the wireless net "SKOLENET".
- A window pops up where you type in your username (Brugernavn) and password (Adgangskode).
- When your credentials have been typed correctly you are required to change the password.
- Your new password must contain at least 8 characters.
Capitals, small letters and digits must be present. It cannot contain æ, ø, å, spaces or your name.
- UNI-login is used for Lectio and some Internet pages that give this option.
- After your password is changed it needs to be synchronized and it may take up to 30 minutes for it to work in Lectio and on the Internet.

You can change the password at any time via a link on <http://norreg.dk> (click links -> UMS -> skift adgangskode)

Do NOT change the username or password from within the Lectio web site.

If you need support you are always welcome to contact the IT-department.
