

# UNI-login and wireless access

## Internet, Lectio a. o.

All students at Nørre G have their own UNI-login. UNI-login is one set of username and password that gives you access to several systems.

The password can be changed but not the username.

Before you login for the first time with your UNI-login you need to change the password. The password is generated by our system and consists of "Itce" followed by the last four digits in your CPR number (e. g. Itce1111). You change it as follows:

- Connect to the wireless net "SkoleStart".
- Open your browser
- Choose "Nørre Gymnasium"
- Change your password. It must contain at least 6 characters (letters and digits). It cannot contain spaces or your name.
- Read the message to see if the password change was successful or not. If not correct the error and try again.
- Close the browser.
- Your UNI-login can now be used.

***Do NOT change the username or password from within the Lectio web site – it will not work properly.***

Your UNI-login gives access to the wireless net this way:

- Connect to the wireless net "NorreG"
- A window pops up and you fill in your ***username*** and your new ***password***.
- UNI-login is also valid for Lectio and some Internet pages that give this option.
- Whenever your password is changed it may take up to 30 minutes before it works in Lectio and on the Internet.

If you need support you are always welcome to contact the IT-department.
